

TOURTELLOTTE SOLUTIONS

YOUR VISION REALIZED

Tourtellotte Solutions produces leading supply chain applications – tcVisualize™ for the pharmaceutical industry and RockBlocks® for the retail industry – and builds custom enterprise solutions for Fortune 500 companies worldwide.

Headquartered outside Boston and growing an average of 60 percent per year, Tourtellotte was born as a consultancy. That legacy of technical prowess, business acumen, and fanatical customer focus is what makes us so sought after as a software solutions partner. We build products that speed delivery, reduce waste, and increase profitability.

The leading innovator in clinical supply modeling

Tourtellotte’s paradigm demolishing tcVisualize™ application achieves the previously impossible. Quite simply, it eliminates guesswork in clinical trial supply.

Our revamped and powerful RockBlocks® application, which we acquired in 2005, has been completely reworked

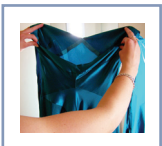

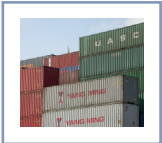

and made both web and client-server accessible. RockBlocks® is streamlining millions of retail sourcing transactions every year.

The market leader in global sourcing for retail

Each year, Tourtellotte Solutions consulting teams build, customize, and integrate custom enterprise applications for our many Fortune 500 customers.

Technical brilliance, transformational products, excellent project management, and intense customer commitment are all part of Tourtellotte. We create applications that solve any company’s most intricate global challenge. Whether your business is looking for a simplified, efficient supply chain, the perfect clinical trial plan, or an ingeniously customized enterprise solution, you’ll find an unparalleled partner in Tourtellotte Solutions.

An effective custom development and integration partner

SOURCING. YOUR VIEW. YOUR WAY. ■■■

RockBlocks® supports the **entire** sourcing process – from quotation to delivery – and manages every milestone in between. This robust application identifies cost savings, streamlines and automates, improves speed to market, increases margins, reduces lead time, and supports increased market demand for high-quality goods at competitive retail price points. Every year, RockBlocks® sources over \$50 billion of goods worldwide – and no wonder:

- Unparalleled landed cost calculation and measurement.
- Real-time process optimization and automation.
- Sourcing decision support tools for product and vendor selections.
- Critical path monitoring.
- Exception management that allows preemptive action to mitigate risk.
- Available 24/7 support.

TCVISUALIZE BRINGS THE SUPPLY PICTURE TO LIFE ■■■

tcVisualize™ gives clinical trial stakeholders the power to model and visualize complex supply chain scenarios – and avoid costly errors. With tcVisualize™, plan and play out scenarios, vary study parameters, see live study tracking and reporting, and replay or run forward in-progress studies with existing or altered parameters. Get answers to critical supply questions before and during a trial. Minimal waste, no shortages, no guesswork – the perfect supply chain plan, achieved.

- Supports variable, fixed dose, dose escalation, crossover, double dummy, and other trial designs.
- Simulates combination of floor/ceiling and predictive algorithms for depots and sites.
- Advanced Controls – including enrollment variance thresholds – allow fine tuning and analysis.
- Ability to import and replay actual data, compare and contrast to assumptions, and simulate forward with current or modified supply chain configuration.
- Available 24/7 support.

YOUR VISION REALIZED ■■■

Tourtelotte crafts enterprise solutions for Fortune 500 companies worldwide. Using the company's technical depth, customer focus, and proactive project management approach, we consistently deliver technical innovation. We drive powerful functionality, often by using an iterative process to minimize overhauls and revisits.

TS consultants:

- Possess unmatched technical ability.
- Balance time, resources, scope and cost.
- Set fixed implementation timeframe – and time-box critical activities.
- Aggressively manage scope and key scope risk factors.
- Provide insight into business trends and how market forces impact company processes.
- Continuously measure results driving process improvements and cost savings.
